

The International Windship Association facilitates and promotes wind propulsion for commercial shipping worldwide.

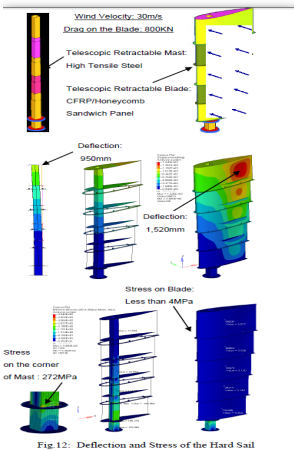

We bring together all parties in the development of the windship sector to shape industry and government attitudes and policies.

We invite you to join this dynamic and strongly developing industry segment.

Our attractive communication packages enable you to introduce your USP's to our member projects & supporters

What is the IWSA?

A member driven association facilitating and promoting maritime wind propulsion solutions. Our goal is to deliver concrete outcomes in five critical areas:

Network

Creating a **clear sectoral approach**, grouping like-minded organisations and individuals to share ideas, skills, technical and market information and resources for the development of commercial wind-ships.

Facilitate

Initiating the **establishment of common approaches/ criteria** for all stages of wind-propulsion projects, advise stakeholders and to lobby legislative bodies on policies, activities, funding and incentives required to retrofit, upgrade and the new build of commercial wind- ships.

Promote

Promoting the **economic value of wind propulsion** to the industry

Incubate

Assisting in **securing funding streams**, project collaboration, grant applications, research and pooling of resources.

Educate

Acting as a **central information hub for the wind-ship** sector for the shipping industry, the media, NGO's, ports, equipment producers, shipbuilders, governments and the **general public**.
